

FOOD 2030 Networks Conference 2025

Engaging, Collaborating and Partnering for Maximizing Impact

Tuesday 2 December at University of Copenhagen, South Campus, Denmark

Objectives

The conference aims to accelerate collaboration and impact across the FOOD 2030 community by fostering joint actions, strengthening communication and dissemination, and providing practical training on public engagement and social media mobilization. It also seeks to build and coordinate partnerships and networks that can amplify the uptake of innovative technological, social and governance solutions for sustainable food systems, and offers participants the opportunity to present results from projects and living labs during a dedicated poster session.

Target groups

The conference is designed for project coordinators, work package leaders and other representatives from projects in the FOOD 2030 Project Collaboration Network, living lab practitioners in the FOOD 2030 Connected Lab Network, and representatives from European partnerships, networks of projects, researchers, and other stakeholders committed to advancing food system transformation. If you would like to join the FOOD 2030 Project Collaboration Network or the FOOD 2030 Connected Lab Network, please send an e-mail to info@food2030.eu.

See conference program below and register by completing the form at <https://t.ly/BGUSK>

NB: Please note that due to limited space, participation will be confirmed on a weekly basis to ensure a balanced representation across the networks

The FOOD 2030 Networks Conference - Engaging, Collaborating and Partnering for Impact is funded by the European Union and organized by the CLEVERFOOD project as a side-event to the official Danish EU Presidency conferences Boosting and Mainstreaming the Bioeconomy and Transformative Governance for Food Systems and Biodiversity (see www.bioeconomy.ku.dk).
